FOR IMMEDIATE RELEASE

Introducing AMPS Technology: The Next Frontier in Pump Packing

Chesterton Revolutionizes Industrial Sealing Solutions with Game-Changing Innovations

[Perth, Western Australia, December 13, 2024]

“Our approach is focused on solving real-world equipment and process issues to help reduce costs and increase profit margins for our customers,” said a Chesterton spokesperson. “We strive to increase the overall competitiveness of our clients through innovative, high-performance solutions.”

Continuing its tradition of innovation, Chesterton proudly announces **AMPS™ (Advanced Modular Packing System) Active Loading Technology**, a groundbreaking technology poised to revolutionise pump packing solutions. AMPS is designed for superior performance and safety, reduces leakage, extends equipment life, and minimises downtime. Its modular design provides customisable configurations for diverse applications, ensuring optimal results with minimal maintenance.

“AMPS is a leap forward in pump packing technology,” said Ron Frisard, Product Line Director for Mechanical Packing at AW Chesterton. “It offers customers unparalleled reliability, efficiency, and safety—key elements in today’s demanding industrial landscape.”

Empowering Asia Pacific with Excellence

Chesterton supports the Asia Pacific region through its superior product portfolio, innovative solutions, and robust distribution network. Chesterton helps industries achieve sustainability, safety, and operational excellence by addressing critical equipment and process challenges.
