FOR IMMEDIATE RELEASE

Chesterton Launches ARC SD4i RC: Next-Generation Internal Liner for Severe Industrial Conditions

Perth, Western Australia — [26 May, 2025] — A.W. Chesterton Company proudly announces the launch of **ARC™ SD4i RC**, a cutting-edge, high-performance internal lining solution engineered to withstand the harshest industrial conditions, including corrosion, erosion, and aggressive chemical attack.

Developed as part of Chesterton's trusted ARC Industrial Coatings line, ARC SD4i RC offers exceptional protection for metal surfaces found in demanding applications such as flue gas desulfurisation systems (FGDs), chemical scrubbers, and fluid-handling equipment.

Built for Extreme Performance

ARC SD4i RC is a reinforced, abrasion-resistant ceramic coating formulated to deliver:

- Outstanding resistance to sulfuric acid condensate and other aggressive chemicals
- Exceptional erosion and corrosion protection in high-flow environments
- Extended asset life, reducing the frequency and cost of repairs
- Fast return-to-service times to minimise operational downtime

---

Ideal for Harsh Environments

This lining system is specifically designed to safeguard metal components in:

- Scrubbers and absorbers
- Slurry pipelines
- Mixing tanks and process vessels
- Pumps, fans, and impellers

ARC SD4i RC provides a chemically resistant barrier with superior mechanical durability, making it the preferred choice for industries such as power generation, chemical processing, mining, water treatment, and pulp and paper.

Setting a New Standard in Lining Protection

"With ARC SD4i RC, we're raising the bar for protective coatings in aggressive service environments," says Steve Bowditch, Chesterton Global Line Director "It reflects our commitment to helping our customers improve equipment reliability, safety, and long-term performance in the most demanding operating conditions."

Availability

ARC SD4i RC is now available in the Asia Pacific market through Chesterton's authorised distributor network. For product data sheets, application guidelines, please visit:
