S.T.A.M.P.S.

1 Size

The shaft or sleeve size needs to be within the available size range.

2 Temperature

The temperature helps to determine the type of elastomer.

3 Application

What type of equipment? Is it continuous operation or start-stop?

4 Medium

Medium indicates chemical resistance of materials to be used.

5 Pressure

Pressure needs to be within the allowable pressure limit of the seal.

6 Speed

Speed will help to determine what faces to use.
